Corner Arch bead

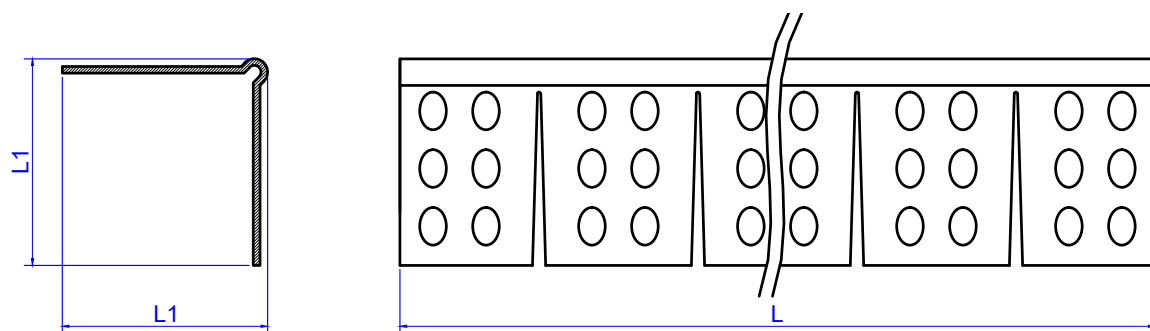

Corner Arch bead

Length 2,5m

An arch bead without mesh is used to create a clean, strong, and perfectly smooth edge on curved or arched plaster and render surfaces. It provides a precise guide for the trowel and reinforces the vulnerable curved edge against chipping and impact, ensuring a durable, professional finish.

Hard PVC

Technical drawing

Dimensions (L1)	
23mm	31mm

For dry wall system

1. Pin the arch bead to dry wall boards to match the required curve.
2. Trowel a layer of base coat, feathering the edges to create a smooth, seamless transition with the rest of the surface of dry wall boards

1

Apply Adhesive

Trowel a layer of skim coating adhesive along the corner of the plasterboard.

2

Embed the Corner Bead

Press the corner bead firmly into the fresh adhesive, ensuring it is plumb and perfectly straight.

3

Finish the Surface

Trowel a final, thin layer of base coat, feathering the edges to create a smooth, seamless transition with the main wall surface.

We invite you to reach out to our team to discuss our custom packaging solutions.

Packaging for Arch Bead

Box	100 pieces
-----	------------

Application must be carried out in ambient temperatures between +5°C and +35°C*.

Installation is to be performed by qualified and trained professionals only.

Store at dry place, not directly on Sun.
